## DETAILED ACTION

### *Drawings*

1. The drawing correction filed on 6/13/01 has been accepted by the examiner.
2. With respect to the pre-amendment filed on 6/13/01, claims 1-15 are pending.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 7-9, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Onoda et al (DE-4317757 A1).

Regarding claims 1 and 8, Onoda et al discloses a thermal insulation (30) arranged in the measurement instrument, a controller (24-28) for controlling the temperature in the measurement unit, the controller for controlling a first temperature comprises a temperature sensor (25), and means (28) to influence the first temperature so that the temperatures at locations with said selected components within the measuring unit are kept substantially constant (see abstract and figure 1).

Regarding claims 2 and 9, casing (22) is considered as thermal barrier.

Regarding claim 3, the first temperature is measured inside the casing with respect to the temperature outside of the casing.

Regarding claims 7 and 14, see title for liquid chromatography detector.

Regarding claim 15, see figure 1 for optical detector (12,21).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Onoda et al.

Onoda et al does not explicitly teach that the first temperature is above the ambient temperature by about one half of the expected variation of the ambient temperature; however, it would have been obvious to one having ordinary skill in the art at the time the invention was made to measure the first temperature which is above the ambient temperature by one half of the variation of the ambient temperature because the device would function in the same manner if a specific measurement is desired.

***Allowable Subject Matter***

7. Claims 5-6 and 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
